## **PRINCIPLES OF PROJECT MANAGEMENT SEMINAR**

---

**Sponsored by  
Lake Area Industries/McNeese Engineering  
Partnership**

**May 1-3, 1991**

**Business Conference Center**

**McNeese State University Campus**

## **Practical Methods for Planning & Control of Engineering & Construction**

### **About the Seminar:**

All companies recognize the importance of successful projects — projects that finish on-time, on-budget, on spec., and result in a profit. The effective use of Project Management Methods helps assure that the right things are done and timely decisions made throughout the project to achieve the desired results.

The seminar will present an overview of the project management methods that are appropriate at each stage of a project: Evaluation, Engineering, and Construction.

The seminar will provide workshop exercises and a hands-on computer workshop to illustrate project management principles.

### **Who Should Attend:**

People with project responsibility, such as managers, engineers, or supervisors.

The seminar is limited to 40 attendees.

### **Seminar Fees:**

\$275 per individual for members of the Lake Area Industries/McNeese Engineering Partnership.

\$500 per individual for non-members.

Make checks payable to M.S.U. Foundation, Account No. 0123

## **PROGRAM SCHEDULE**

- Wednesday, May 1
    - \* 8:00-8:30 A.M. Registration of Attendees
    - \* Introduction of Modern Methods of Project Management
    - \* Project Planning
    - \* Project Management in the Evaluation Phase
    - \* The Critical Path Method, Project Modeling
  - Thursday, May 2
    - \* Managing Resources (scheduling, analysis)
    - \* Managing Design
    - \* Managing Multiple Projects
    - \* Principles of Project Control
  - Friday, May 3
    - \* Hands-on PC Workshops
    - \* Planning, Resource
    - \* Scheduling of Project
    - \* Control Using Time Line
    - \* Software
- Lunch will be provided on the premises. Cost included in seminar fee.
