# Health Systems Management

**Degree Type:**

**Bachelor of Science (B.S.)**

**Program Length:**

**4 years (120 credit hours)**

## What Can You Do With a Degree in Health Systems Management?

Health systems management students can pursue careers in a number of different healthcare settings after graduation, such as hospitals, residential care facilities, outpatient care facilities and rehabilitation facilities. Many students from McNeese also go on to successfully pursue graduate degrees in health systems management or related fields.

- **Assistant Healthcare Facility Administrator**

- **Health Promotion Specialist**
- **Health Systems Manager**
- **Medical Practice Manager**
- **Medical Scribe**

**MCNEESE STATE UNIVERSITY**

# WHY MCNEESE?

*Here are just a few reasons to make McNeese your first choice ...*

## **Financial Aid and Scholarships:**

McNeese has one of the most affordable tuition rates in Louisiana. Plus, there are a number of scholarships that health systems management students can apply for, including the Francis X. Bride Scholarship in Science and Health Professions and the Dr. and Mrs. David Buttross Jr. Health Management Scholarship.

## **Research-Based Learning:**

Throughout their course of study, students are deeply involved in learning how to research, analyze and present materials to improve healthcare processes, including improving patient flow through facilities, decreasing lab work turnaround time, mitigating risks for patients and providers and ensuring facilities meet government and system credentials to remain certified.

## **Expert Faculty:**

As experienced professionals in the healthcare field, faculty are actively involved in the wider health systems management community, keeping their knowledge of current technology and best practices in the clinical setting up-to-date.

## **Internship Experience:**

Students in the health systems management major complete a 320 hour internship to gain hands-on experience in the healthcare environment. In this internship, students work with a mentor within the organization – as well as other professionals in disciplines such as marketing, administration and human resources – to identify organizational needs and goals and work towards meeting them. Previously, students have worked in quality improvement, data analysis and project development.

---

## **Student Activities|**

With more than 100 student clubs and organizations on campus, McNeese offers a variety of ways health systems management majors can participate in academic, social and professional events on campus and in the community.

---

## **Flexible Learning Options**

With between 50-99% of classwork offered online, McNeese's degree in health systems management offers students the freedom and flexibility to study from home and at their own pace. With online options, many students are able to complete their degrees in as little as three years.

---

## **College of Nursing and Health Professions**

The mission of the College of Nursing and Health Professions is to prepare healthcare professionals to provide direct or indirect care to meet the healthcare needs of individuals, families, populations and systems. With state-of-the-art technology, hands-on learning opportunities and highly dedicated faculty, McNeese students are prepared to provide excellent care to their communities.
